### Portfolio Disclosures:

The 95% Probability Range was calculated using a long-term average for the S&P 500, average change in the Ten Year US Treasury Rate, and correlation and volatility data from 2008 to present. Nest Egg uses actual historical data to calculate the statistical probabilities shown. For securities calculated using Average Annual Return, the Average Return will be calculated using actual price history from June 2004-present or inception. We calculate the annualized return number as  $(\text{final price} / \text{initial price})^{(1 / \text{number of years})} - 1$ . Nest Egg does not provide investment analysis on investments with less than 6 months of historical performance. In instances where an investment's inception is more recent than January 1, 2008 and greater than 6 months Nest Egg will use correlation statistics from the investments actual trading history to extrapolate missing volatility data. In most cases the extrapolation calculation increases the risk presented in the investment analysis as a means of protecting the investor.

Investments with an inception more recent than January 1, 2008 are highlighted with an information icon. The Six Month 95% Probability Range is calculated from the standard deviation of the portfolio (via covariance matrix), and represents a hypothetical statistical probability, but there is no guarantee any investments would perform within the range. There is a 5% probability of greater losses. The underlying data is updated as of the previous day's market close price, and the results may vary with each use and over time. The investments considered were determined by the financial representative. **IMPORTANT:** The projections or other information generated by Nest Egg regarding the likelihood of various investment outcomes are hypothetical in nature, do not reflect actual investment results and are not guarantees of future results. These figures may exclude commissions, sales charges or advisory fees which, if included, would have had a negative effect on the annual returns. In instances where a security is unrecognized by the Nest Egg system or a security does not yet contain more than six (6) months of historical return data, Nest Egg may assign a benchmark/proxy to more accurately display risk and return analytics. In these instances Nest Egg will use the historical data associated with the benchmark/proxy indicated.

### Class Action Waiver
